LEADERSHIP

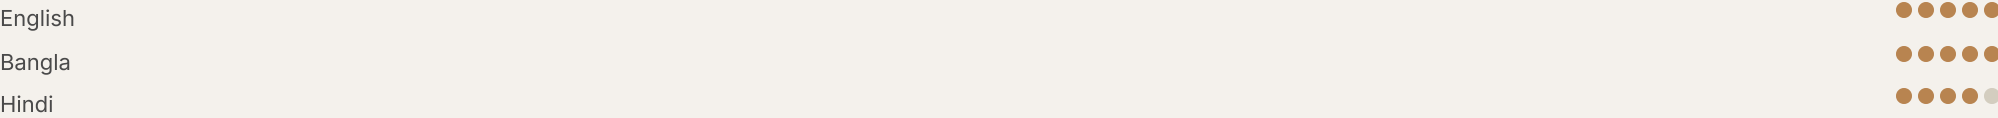

ENGINEERING

PROUD OF • FY27

- 100% Effective Manager in latest GIS results
- Zero attrition across three reorgs
- 5 promotions sponsored this cycle (P9 / P7 / P6)
- ~100% adoption of dev-productivity AI tools
- 23% trust reduction vs 20% target across 3 teams
- Cross-cloud architecture stewardship to GA

LANGUAGES

BEYOND WORK

- Volunteering
- Travelling

Software Engineering Manager with 15+ years building and scaling distributed teams across web platform, content infrastructure, and reliability engineering. Currently lead two teams at Salesforce — **Rich Agentic Experiences** (cross-surface experience layer powering agentic surfaces) and previously **Web Platform Services** (headless rendering layer behind flagship marketing properties). Manage **14 engineers spanning AMTS to LMTS**; sponsor cross-cloud architectural alignment; deliver on-time customer GAs; and grow people through every reorg.

“
I coach my people so they're ready for a better job tomorrow — and treat them so they choose to stay today.
”

— LEADERSHIP FIRST PRINCIPLE

✦ **AI-First Mindset**

AI-native engineering culture. Build internal MCP tools, ship Claude Code skills, automate trust triage and release planning. Drove **~100% org-wide adoption of developer-productivity tools** — shorter engineering cycles, greater capacity with fewer resources.

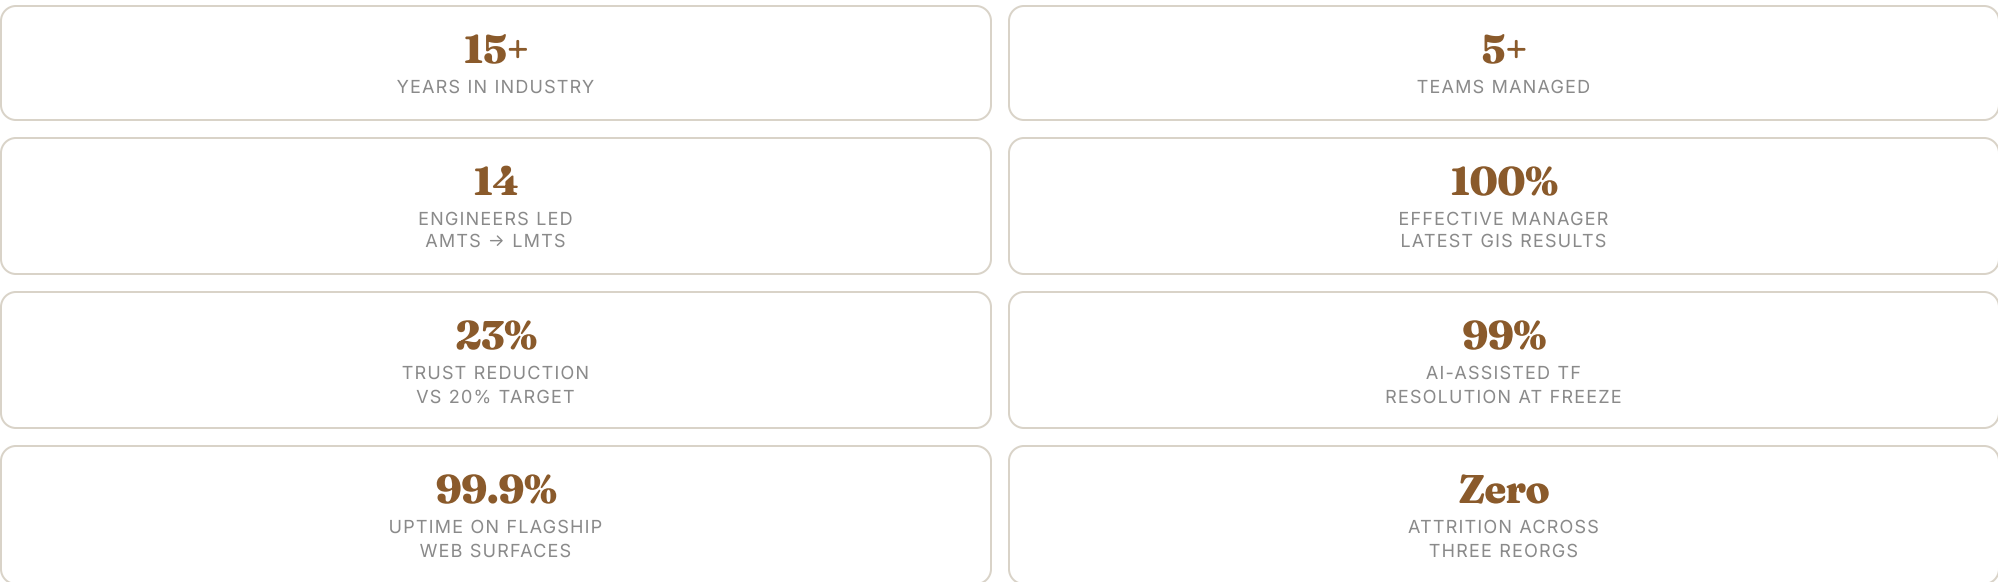

👥 **People-First Culture**

Every IC's career trajectory continues — through reorgs, transitions, charter changes. **Zero attrition** across three org transitions; **100% Effective Manager Score** in the latest GIS.

🤝 **Collaboration at Core**

Cross-cloud DRBs, multi-team release coordination, and stakeholder alignment across PM, UX, and adjacent platform orgs. **Partnership is the default**, escalation the exception.

CAREER HIGHLIGHTS

EXPERIENCE

- Software Engineering Manager — Rich Agentic Experiences** NOW

Salesforce — Hyderabad

JUL 2024 — PRESENT

Lead two engineering teams in the Rich Agentic Experiences org powering authoring infrastructure and content metadata for AI-agent surfaces. Manage **14 engineers spanning AMTS to LMTS**. Drive a visual authoring framework targeting Beta + GA, multi-release content data integration toward a major release event, and trust + reliability commitments across parallel release trains. Sponsor cross-cloud architectural alignment with adjacent platform teams. Sustain a culture of disciplined release execution and AI-first productivity. Sponsored **five promotion nominations** in the current cycle (P9 / P7 / P6) and held **zero attrition** through three org transitions.
- Senior Member of Technical Staff — Web Platform Services**

Salesforce — Hyderabad

JUN 2021 — JUN 2024

Drove cross-functional initiatives on the headless rendering layer behind flagship marketing properties. Led framework-agnostic rendering to GA, regional and locale launches, content-compliance CDN redesign, certificate-management automation, and a public-CDN migration. Reduced build & deployment times **~30%**, sustained **99.9% uptime** on customer-facing surfaces, and eliminated certificate-related production outages post-automation.
- Senior DevOps Engineer**

Microsoft — Hyderabad

MAY 2017 — JUN 2021

Led reliability and automation for a global business-applications SaaS on Azure. Contributed to onboarding, environment design, capacity planning, deployment, and servicing for **~4,500 customer environments**. Sustained near-100% availability through proactive issue resolution and on-call ownership.
- Technical Lead — DevOps**

Samsung R&D Institute India — Bengaluru

JUN 2015 — MAY 2017

Led DevOps initiatives across architecture design, cloud infrastructure setup, and backend operations for live and R&D consumer products including a payments platform and a creator-network app. Built internal tooling and scalable workflows.
- Service Reliability Engineer**

Yahoo! — Bangalore

DEC 2013 — JUN 2015

Managed back-end operations for high-visibility ads and data-platform services. Built automation that reduced incident resolution time by **25%**. Triage production outages proactively to minimize downtime.
- Assistant System Engineer**

Tata Consultancy Services

OCT 2012 — DEC 2013

Developer for a global trade-capture and trading system at an enterprise banking client — Unix and C++ integrations.

EDUCATION

- JAN 2008 — JAN 2012
Bachelor of Technology — Computer Science & Engineering
West Bengal University of Technology, Asansol
- JAN 2004 — JAN 2008
Senior Secondary — Pure Science
Chinmaya Vidyalaya, Bokaro · CBSE Board
